2. Details

Title: Attending the “Basics in VTE – Getting it right from the start” conference hold by Thrombosis UK (standard 2).

From 6th October to 15th October 2021, I attended the above conference virtually. The main theme is about venous thromboembolism, its signs, diagnosis, and treatment. In daily haematology practice, thrombotic disorders including VTE, PE, DVT and DIC are common and often life-threatening. Therefore, a well-structured algorism should be developed.

More importantly, the speakers discussed the insensitivity of the D-dimer test (standard 4). The administration of thromboprophylaxis (type, method, time) were discussed.

Please see below for my Certificate of Attendance issued by ThrombosisUK.
